Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mori (JP 11-348576) in view of Peterson et al (US 6,329,439), Okada et al (US 5,728,744) and Kato et al (US 5,992,928) as set forth in Paper no. 5.

Response to Arguments

4. The art rejections have been maintained for following reasons. The motivation to combine Mori, Peterson and Okada with Kato is sufficient and proper. The weather strip of Mori, Peterson and Okada as modified by Kato would teach or suggest a molded part being composed of a non-foamed TPO having a hardness of Hs 40° to 50°. Kato discloses a TPO molding portion of a weather strip wherein the preferred hardness for the molding portion is within the range 20 to 80 (column 2, lines 55-59). Kato also discloses that hardness values in this range produce good moldability, good strength and good absorption of expansion and contraction forces (table 1, column 5, lines 32-53). Therefore, it would have been obvious to the skilled artisan at the time the invention was made to use a die-molding portion with a hardness within Applicant's claimed range, motivated by the desire to produce a weather strip

with good moldability, good strength and good absorption of expansion and contraction forces.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
